# POLAR PERSPECTIVES

## DISCOVERIES

### Price

*Phi*-based impulse pattern (+260% / +2600% / +26000%) since 1780 revealed for SPX

*Phi*-based ratio growth pattern (1.000 / 2.618 / 2.618<sup>3</sup>) since 1932 revealed for DOW

### Time

20/40/80-year nested cycles over more than 300 years revealed for Equities, and further nesting in 240/960/2880-year national/cultural cycles intersecting with 400/800-year military cycles revealed with provocative medium-term implications

100-month cycle revealed for GBPUSD

### Symmetry

Price + Time rhythms revealed for GOLD via uniquely-constructed 1100-year price-history

Price + Time rhythms revealed for USDJPY and NIKKEI

### Correlations

Periodic change in relationship, and synchronisation of major turning points with extremes in derivative calculations, revealed for SPX and EURUSD.

Connection revealed between important SPX turning points and extremes in short-term USD interest rate futures relative to eventual Libor rates at maturity.

Long-term shifts between direct or inverse relationship for Stocks and Bonds explained both fundamentally and technically, with implications for coming years and decades.
